DETAILED ACTION

1. This action is responsive to the following communications: Amendment After Final, filed 10/20/2009.
2. Claims 16, 18-20, and 22 are allowed.

Drawings

The drawings were received on 10/20/2009 (Fig. 4). These replacement drawing sheets are identical to, and replace, Fig. 6, which was filed on 03/30/2009 and accepted in the office action mailed on 07/21/2009.

Specification

The amendment to the Specification filed 10/20/2009 has been received and will be entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claim 16 discloses a method for editing a photo album page, by displaying a first photo album page in a first window, and displaying in a second window next to the first window, a second photo album page based upon the first photo album page. Independent claim 16 discloses an algorithm having the following steps:

...upon receipt of a user command, automatically producing a second photo album page based on said first photo album page and displaying, in a second window next to said first window on said computer screen, said second photo album page for side by side comparison of said first photo album page and said second photo album page, said second photo album page in said second window also including said group of photos, each of said first and second photo album pages having a layout and being capable of being independently modified by said user through manipulation of graphical elements in said first or second window on said computer screen, wherein said automatically producing and displaying occurs without direct user intervention by said user beyond provision of said user command;

receiving first user input in one of said first or second window on said computer screen that modifies part of either said first or second photo album page, wherein said modification enables said user to contrast said first and second photo album pages; and

receiving second user input that selects one of said first and second photo album pages for inclusion in said plurality of photo album pages.

A search of the prior art disclosed no prior art which anticipated the interface with algorithm steps disclosed in independent claim 16.

For example, Microsoft Word 2000 discloses tables and brochures which display images side by side, and copying images, but does not disclose creating *...upon receipt of a user command, automatically producing a second photo album page based on said*

first photo album page and displaying, in a second window next to said first window on said computer screen, said second photo album page for side by side comparison...

...wherein said automatically producing and displaying occurs without direct user intervention by said user beyond provision of said user command;
(emphasis added).

Similarly, other prior art photo album software did not disclose the above interface with corresponding steps of creating a second window containing a second photo album page based on a first photo album page *...wherein said automatically producing and displaying occurs without direct user intervention by said user beyond provision of said user command;...*

For these reasons, it is believed that independent claim 16, and dependent claims 18-20, and 22, are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
